DETAILED ACTION

Specification

The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: The Examiner would like to respectfully bring to the Applicant's attention the format of written language of the Specification. Letter spacing of the claimed language is too close together in order to properly understand the cited language. The proper English grammatical techniques must be followed in order to present a properly formatted Patent Application. Examiner respectfully request correction.

Applicant is required to submit an amendment, which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.

Claim Objections

Claims 1-11 are objected to because of the following informalities: Letter spacing of the claimed language is too close together in order to properly understand the cited limitation. Appropriate correction is required.

Art Unit: 2686
